

The very first integrated polyaxial connexion

Easyspine®

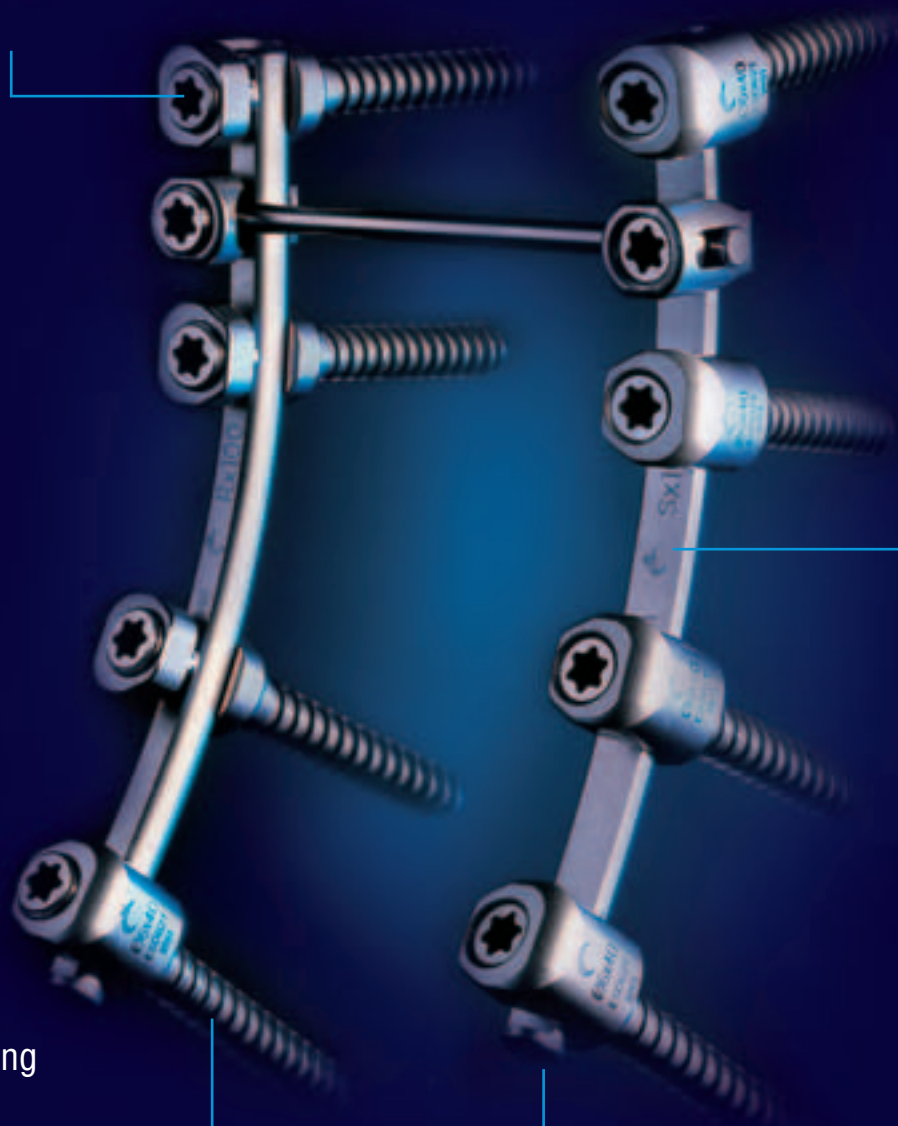

Unique self-contained connexion system

- Self-contained locking component
- Polyaxial locking
- Postero-lateral loading

Mechanical optimisation

- Reliable clamping (flat on flat)
- Optimum bone anchorage
- Less constraints during final locking
- Optimised machining processes
- Excellent mechanical results

A new standard : the LDR® flattened rod

Variable stiffness and constant diameter

- Choice of stiffness
- Safety stop
- Rotational control
- Restoration of lordosis

Sterility and traceability

- Sterile packaging
- Absolute traceability
- Optimised management
- Guaranteed mechanical properties
